Drupal Commerce 2014

What I have learned

Differences between Ubercart and Commerce

Ubercart

- There are versions for 5, 6 and 7
- Node based
- Lots of built in functionality and contrib modules
- Very stable and mature
- Great developer team

Commerce

- Drupal 7 only
- Field Based
- Bare bones and uses other contrib modules
- Stable releases, adding a lot of new functionality
- Great developer team (including original ubercart dev)

Main Commerce Ideas

- Products separate from Presentation
- Uses Views and Rules a lot
- No built-in functionality for shipping or payments
- Most modules are add-ons but that is by design

Recommendations

- Start with Install Profiles
  - [Commerce Kickstart](#)
  - [Open Deals](#)
  - [etc](#)
- Use drupalmodules.com or drupalcommerce.org to find commerce modules
- Watch videos here
  - http://vimeo.com/channels/commerceguys
- Read/post to issue queues on drupal.org

Demo

Modules to consider

Commerce

- Feeds
  - Commerce Feeds
- Commerce addressbook
- Commerce VBO Views
- Commerce Product Display Manager
- Commerce Checkout Redirect
- Commerce Paypal
- Commerce Reporting

Not Commerce

- IMCE and children
- Media Module
- CKEditor
- Module Filter
- Masquerade
- Menu Expanded
- Pathauto
- Token
- Backup Migrate

Questions
